INDUSTRIAL EQUIPMENT DATA, NOVEMBER 1953,  
EXTRACTED FROM CHINESE COMMUNIST PRESS

MANUFACTURE OF INDUSTRIAL AND SCIENTIFIC EQUIPMENT -- Tientsin, Ta Kung Pao, 5 Nov 53

The first 20,000 kilovolt-ampere transformer made in China was successfully tested on 23 November 1953 at the Mukden Transformer Factory where it was built. This transformer, made according to Soviet specifications will be installed at the An-shan Iron and Steel Company.

This same factory also produced a 10,000 kilovolt-ampere and a 10,350 kilovolt-ampere transformer in 1953.

Tientsin, Ta Kung Pao, 28 Nov 53

The largest ore-crusher ever built in China and as large as any in the Soviet Union, weighing 60 tons and with a capacity of crushing 500-800 tons of ore per hour, was successfully tested at the Mukden heavy Machinery Plant.

Tientsin, Ta Kung Pao, 21 Nov 53

The privately operated Kung-yung Electric Machinery Factory in Shanghai is manufacturing motors under a subcontract with the government.

The publicly and privately operated Chung-hua Scientific [Equipment] Company of Peiping has expanded its operations since it changed from a privately operated firm to a joint enterprise.

This firm, which was engaged in the manufacture of test tubes, beakers etc., is now producing more than 1,000 types of laboratory equipment. The employees have increased from 130 to 276, and monthly production has jumped in value from 200 million yuan in 1950 to 800 million yuan in late 1953.

This firm supplies laboratory equipment to all the schools as well as hospitals in Tientsin and Peiping and sells to the Academia Sinica, the research offices of the Ministry of Agriculture, and the Central Health Research Institute.
